

Vertical Files

Features

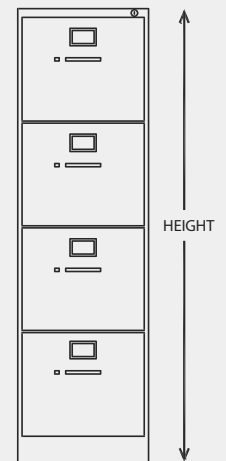

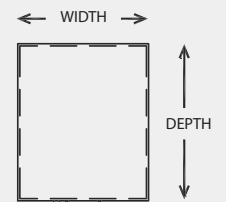

- Two and four drawer file cabinets assembled from cold rolled 20 & 22-gauge steel
- Cabinets are shipped completely assembled and have torsion bars (side rails and cross bar) along eight corners that are welded to each other in 3 three places to ensure squareness
- Three piece 14-gauge steel ball-bearings slides provides smooth, quiet operation and allows maximum drawer extension
- Drawer slides are rated at 160 lbs. per pair
- Drawers are equipped with aluminum pulls, label holders and thumb latch to secure drawer
- Drawer slides have an automatic interlock which prevents more than one drawer opening at a time, reducing the chance for cabinet tip over
- Drawers have Neoprene rubber bumpers between the drawer and case sides to prevent metal to metal contact
- Locks activate duel lock bars that secure both sides of the drawers
- Features removable core locks that have 200 possible key changes, with special orders, 400 key changes are possible
- Cabinet is equipped with four leveling glides
- Cabinet finish is approximately 2mm powder-coat hybrid epoxy that is applied using an electrostatic process with a heat curing oven which has been proven to have great longevity and appeal
- Meets or exceeds applicable ANSI/BIFMA standards
